Overview

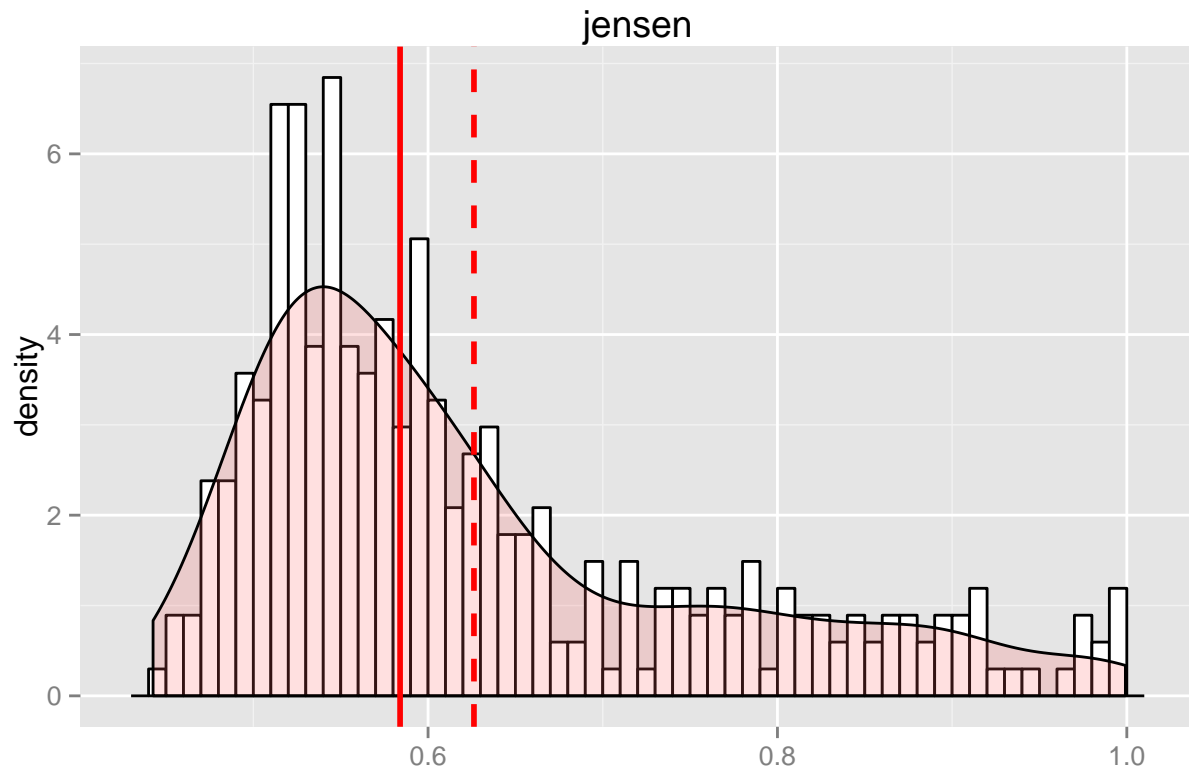

Histogram of AUC for all 2688 scenarios.

Mean: 0.6295113

Median: 0.581706

Distribution of AUC values per Distance Measure

AUC in dependency of measures and criteria

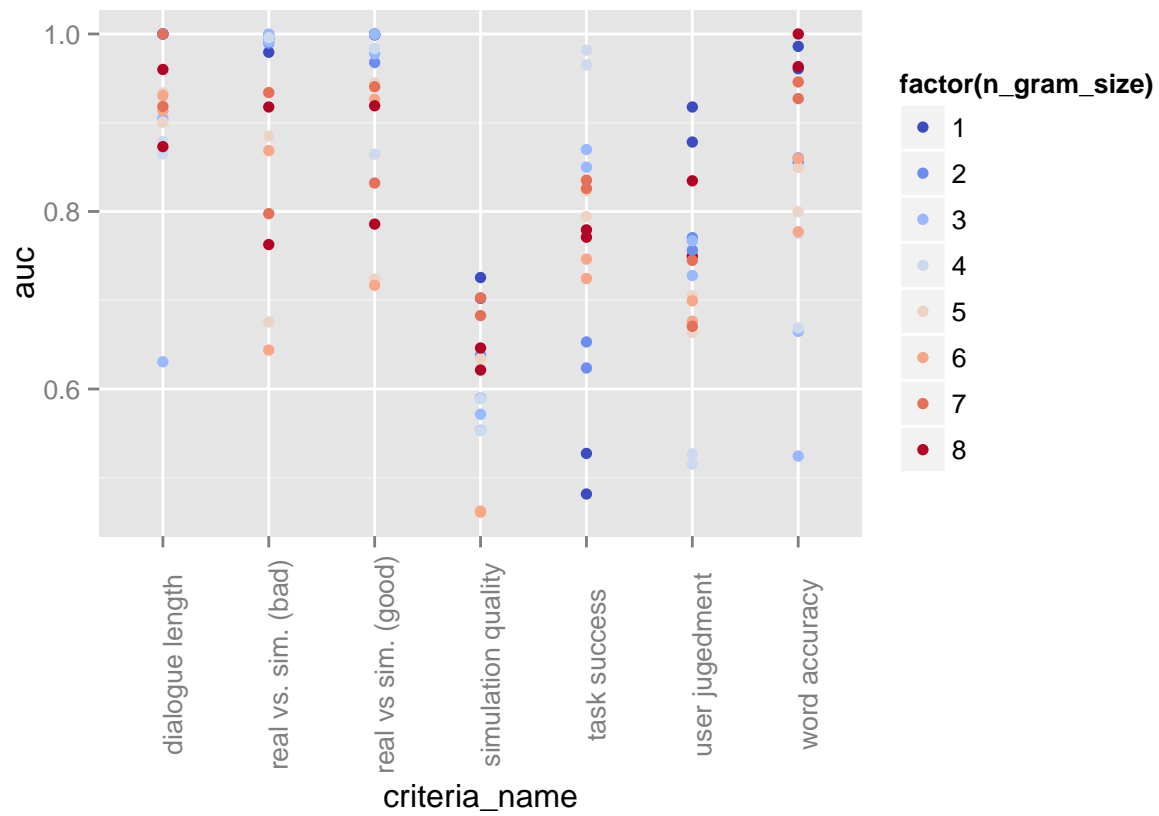

```
ggplot(cutted, aes(x=criteria_name, y=auc, color=classifier_name)) + geom_point() +  
  theme(axis.text.x = element_text(angle=90)) +  
  scale_colour_manual(values = discrete_cm(unique(cutted$classifier_name)))
```

Rank Order

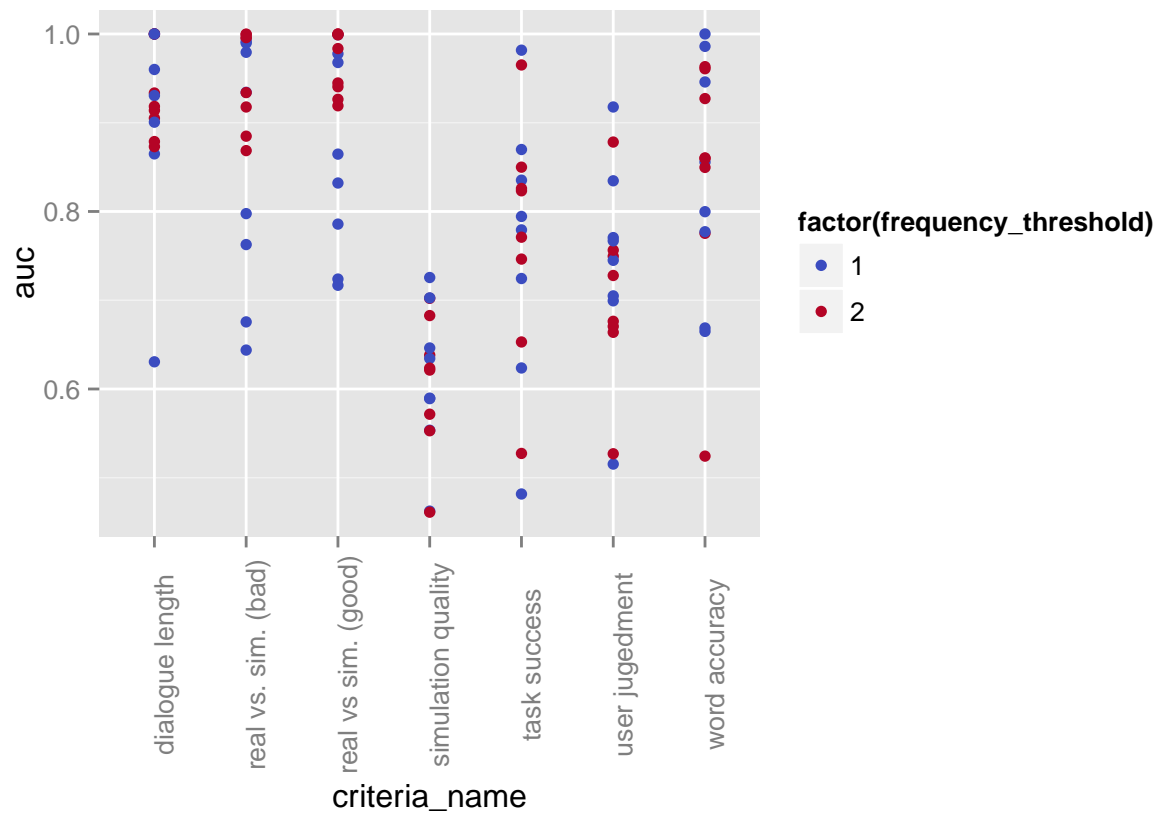

AUC in dependency of n-gram size and criteria

```
ggplot(cutted[which(cutted$classifier_name == 'rank order'),], aes(x=criteria_name, y=auc, color=factor(n_gram_size)) +  
  geom_point() +  
  theme(axis.text.x = element_text(angle=90)) +  
  scale_colour_manual(values = discrete_cm(unique(cutted$n_gram_size))))
```

AUC in dependency of frequency threshold and criteria

```
ggplot(cutted[which(cutted$classifier_name == 'rank order'),], aes(x=criteria_name, y=auc, color=factor(n_gram_size))) +
  geom_point() +
  theme(axis.text.x = element_text(angle=90)) +
  scale_colour_manual(values = discrete_cm(unique(cutted$frequency_threshold)))
```

AUC in dependency of frequency threshold and criteria

```
ggplot(cutted[which(cutted$classifier_name == 'rank order'),], aes(x=criteria_name, y=auc, color=factor(frequency_threshold))) +
  geom_point() +
  theme(axis.text.x = element_text(angle=90)) +
  scale_colour_manual(values = discrete_cm(unique(cutted$smoothing_value)))
```

Details about different AUC, Scenarios, Measures

Tables with 5 best classifiers per criteria

```
